

# HMRC Trader Dress Rehearsal (TDR) Master Requirements Document

Public-source audit pack generated from HMRC and GOV.UK publications reviewed on 2026-03-26.

This document consolidates the official HMRC publications governing the Trader Dress Rehearsal programme that were available in the reviewed public corpus. It includes rule extraction, source traceability, best-practice consolidation, a change-log summary, and an evidence-gap statement for items HMRC does not publish publicly.

## Audit Summary

| Metric                                      | Value |
|---------------------------------------------|-------|
| Total checklist rows / rules                | 3131  |
| Expanded field-level rules                  | 2466  |
| Cross-field derivation rules                | 645   |
| Manual/global rules                         | 20    |
| Unique import field definitions             | 179   |
| Unique export field definitions             | 147   |
| Unique additional-message field definitions | 15    |

## Source-Scope Notes

**Official publication inventory scope:** The reviewed source set combines public GOV.UK guidance pages with the HMRC Developer Hub technical-documentation bundle that HMRC states is the latest issued pack for external software developers.

**Historical-update coverage:** The change-log document dated 20 March 2026 was used as the anchor for identifying documents updated since the TDR pilot period began. Individual internal files do not always expose a stand-alone public URL; the audit therefore cites the bundle URL plus the internal file path or worksheet/slide identifier.

**Evidence gaps:** HMRC does not publish a public consolidated validation-rule count for TDR, nor does it publish traders' zero-error confirmation emails or screenshots. Those quality-gate evidence items remain private-programme artifacts outside the public corpus.

**Public-vs-gated documentation:** The DSSD references API specifications and XSDs on the Developer Hub. Some API endpoints and example-message pages may require allow-listing or sign-in, but the reviewed public bundle still provides the core completion matrices, path definitions and validation semantics needed for this audit.

TDR-R-02506 [Cross-field integrity] Import procedure derivation: declaration type IM, additional declaration type A, and requested procedure 5153 must derive category H4. Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Procedure Category Derivation 2!4. Error pattern: CDS11004 | CDS11005 | CDS12050 | CDS12052.

An update is required in Slide 330 and Slide 378 in the Scope Guidance to update the name and location of the Payment Reference within the DMSTAX. Therefore, payment reference ID tag has been changed from <paymentreferenceNumber> to <ReferenceID> in TT TDR Scope guidance document.

For the following features, amendments have been made into the scope guidance, although no new guidance or technical details has been changed. The said feature would be getting deployed into production only:

## WAF Preventive Rules

GA1: Avoid using semi-colons (;). Replace with commas or spaces. Reason: These are a command and line separator in a number of web programming languages.. Added: v0.1a.

GA2: Avoid the use of the equals sign (=). Reason: Common operator, although not yet known why this is singled-out specifically.. Added: v0.1a.

GA3: Avoid use of forwards slash ( / ). Reason: Remove the use of / in <goodsDescription> elements. Added: v0.3.

GA4: Avoid the use of SQL Keywords(e.g select insert, delete, update,alter,drop,create,having, between, like and null). Reason: These are SQL keywords. Added: v0.4.

## Known WAF Examples

EX1: VALVE - BODY ONLY ( = 1/2") Recommendation: Remove the equals sign.. First seen: 2022-10-01.

EX2: ONLY = ( Recommendation: Remove the equals sign.. First seen: 2022-10-01.

EX3: BEARING; SELECTOR; POTENTIOMETER Recommendation: Remove the semi-colon after BEARING or use a comma instead.. First seen: 2022-10-31.

EX4: ; DROP LEAF TABLES; Recommendation: Remove one of the semi-colons or use commas instead.. First seen: 2022-11-02.

EX5: ; LOAD TYPE Recommendation: Remove the initial semi-colon. First seen: 2022-11-07.

EX6: ; SELECT WINES OF THE DORDOGNE Recommendation: Remove the initial semi-colon. First seen: 2022-11-07.

EX7: ; LOAD BEARING RSJs Recommendation: Remove the initial semi-colon. First seen: 2022-11-09.

EX8: / Recommendation: Remove / from <goodsDescription> elements. First seen: 2024-06-10.

## 2. Data-Format Rules

The TCM workbooks, codelists workbook, secure-file-upload guide, WAF bulletin, authorisation guidance and MUCR format note collectively govern data-format constraints. The public HMRC corpus does not publish a single flat table of every format rule, so this section consolidates the formats and references used by the reviewed documents.

| Codelist                                                   | Referenced fields in extracted |
|------------------------------------------------------------|--------------------------------|
| CountryTypes for these items                               | 24                             |
| CurrencyTypes for these items                              | 10                             |
| CommodityClassificationType for these items                | 9                              |
| SupervisingCustomsOffices for these items                  | 4                              |
| nan                                                        | 4                              |
| CountryRegionSubRoleTypes for these items                  | 3                              |
| TransportMeansIdentificationTypes for these items          | 3                              |
| ProcedureCombinations for DE 1                             | 3                              |
| Y                                                          | 3                              |
| TradeMovementTypes for this item                           | 2                              |
| DeclarationTypes for this item                             | 2                              |
| MeasureUnitTypes and MeasureUnitQualifiers for these items | 2                              |
| DeferredPaymentDocuments for these items                   | 2                              |
| PartyRoleStatusTypes for these items                       | 2                              |
| PartySubRoleTypes for these items                          | 2                              |
| PartyRoleAuthorizationTypes for these items                | 2                              |
| VatPartySubRoleTypes for these items                       | 2                              |
| ExchangeRateCurrencies for these items                     | 2                              |
| LocationTypes for these items                              | 2                              |
| LocationIdentificationTypes for these items                | 2                              |

TDR-R-03123: The secure file-upload service accepts at most 10 files, each up to 10 MB, and only jpeg, pdf, doc, docx, xls, xlsx, or png formats. Reference: CDS Secure File Upload UI User Guide | v0.44 | Section 3.1.5 File Upload. Error pattern: HTTP 413 | BAD\_REQUEST.

TDR-R-03124: Avoid %, ?, &, tabs, and other special characters in secure-file-upload filenames because the service may behave unexpectedly. Reference: CDS Secure File Upload UI User Guide | v0.44 | Section 3.1.5 File Upload. Error pattern: BAD\_REQUEST | HTTP 403 PAYLOAD\_FORBIDDEN | Unexpected file-read failure.

TDR-R-03125: Avoid semicolons, equals signs, slash characters in goods descriptions, and SQL-keyword patterns in free text because these combinations are known WAF triggers. Reference: WAF Trigger Examples | v0.4 | General Advice tab (GA1-GA4). Error pattern: HTTP 403 PAYLOAD\_FORBIDDEN | HTTP 500 INTERNAL\_SERVER\_ERROR.

TDR-R-03126: MUCR values must match HMRC's published CDS MUCR formats, contain no more than one hyphen, and MRNs must not be submitted as export movements. Reference: CDS Guidance for Software Developers - MUCR Format | Baselined | Sections 2 and 4 Appendix. Error pattern: MUCR reference is invalid | DMSREJ | ILE NAK.

TDR-R-03127: Authorisation references declared in DE 2/3 and DE 3/39 must match HMRC-published CDS authorisation formats for the declared authorisation type. Reference: CDS Guidance for Software Developers - Validation of Authorisations | v1.9 | Authorisations Table. Error pattern: CDS12005 | CDS12006 | CDS12007.

TDR-R-03129: The Accept header must target the TDR API version for each subscribed CDS API, including Customs Declarations API v1.0 in TDR. Reference: Developer set up | Customs Declarations End-to-End Service Guide | Web page | API versioning. Error pattern: HTTP 406 Not Acceptable.

TDR-R-03130: TDR should be used for realistic, day-in-the-life declaration proving with real account data, not for performance or exploratory technical testing. Reference: CDS RunBook | v4.3 | Slide 17 Guidance / Slide 2 Connecting to TDR. Error pattern: Support escalation / misuse risk.

TDR-R-03131: Submission planning must account for HMRC's published service-availability notices, planned maintenance windows, and queued-processing warnings. Reference: Customs Declaration Service: service availability and issues | Web page | Current and historical update entries. Error pattern: Service queueing / delayed processing.

### 3. Field-Level Requirements

The following tables consolidate field metadata from the import, export and additional-message completion matrices. Each field retains its XML path, scope level, cardinality, data format, linked codelist (where identifiable from HMRC text), and conditional obligation matrix.

#### Import Field Catalog (sampled in PDF)

| DE/Path | Field                                                  | XML path                                                                                                                                                    | Lvl | Card. | Fmt    | Code list                            | Obligations                                                                                    |
|---------|--------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-------|--------|--------------------------------------|------------------------------------------------------------------------------------------------|
| 1/1     | Declaration Type                                       | Declaration/TypeCode                                                                                                                                        | H   | 1x    | a2     | TradeMovementTypes for this Movement | H1=M; H2=M; H3=M; H4=M; H5=M; H6=M                                                             |
| 1/2     | Additional Declaration Type                            | Declaration/TypeCode                                                                                                                                        | H   | 1x    | a1     | DeclarationTypes for this Movement   | H1=M; H2=M; H3=M; H4=M; H5=M; H6=M                                                             |
| 1/6     | Goods Item Number                                      | Declaration/ GoodsShipment/ GovernmentAgencyGoodsItem/ SequenceNumber                                                                                       | S   | 2x    | n2     | Cannot be 0                          | H1=M; H2=M; H3=M; H4=M; H5=M; H6=M                                                             |
| 1/8     | Signature/Authorisation                                | Paper Declaration Only                                                                                                                                      | H   | 1x    | N/A    |                                      | H1=M - Paper Declaration; H2=M - Paper Declaration                                             |

## 4. Best-Practice Compendium

### Data Preparation

Path-to-production workflow: Use Trade Test first, complete pre-TDR steps, register a TDR app, request TDR API access from SDST, subscribe, then practice declaration scenarios in TDR with real account data on an ongoing basis. Source: The CDS Path to Production (page 5) and CDS RunBook slide 10.

TDR proving approach: Use realistic declaration journeys and real account data; do not use TDR for performance or exploratory protocol testing. Source: CDS RunBook slides 2, 17 and GOV.UK TDR guidance.

Due diligence before submission: Ensure all required data elements are populated correctly, check supporting-document needs, coordinate with supply-chain parties and CSPs, and review CDS error codes before escalating to HMRC. Source: CDS RunBook slide 17.

### Xml Examples

Declaration submission message skeleton: HMRC documents center declaration payloads on the WCO Declaration class with DE-driven paths such as Declaration/TypeCode, GovernmentAgencyGoodsItem/SequenceNumeric, and goods-item substructures. The reviewed public pack provides path definitions and fragments rather than a single standalone full canonical XML file. Source: CDS 03 DSSD v2.30 and WCO References workbook.

Additional-message skeleton: Cancellation, amendment, and goods-arrival messages all require Declaration/FunctionalReferenceID, Declaration/ID and Declaration/TypeCode, with additional information blocks used for amendment and cancellation reasons. Source: CDS Additional Message Technical Completion Matrix v1.4.

Notification metadata and pointer structure: HMRC notifications rely on Response, MetaData, Error, Pointer and AdditionalInformation objects. Pointer resolution uses DocumentSectionCode, SequenceNumeric and TagID to identify the failing element. Source: CDS 03 DSSD v2.30 section 6.2/6.3.

IE-message coverage: The reviewed scope bulletins reference IE501, IE510, IE518 and IE591 scenarios for XI/AES functionality, but those slides are mostly acceptance-criteria statements rather than complete public XML specimens. Source: CDS External TT TDR Scope Guidance 2025-12-04 issue.

### Error Blacklist

WAF-sensitive strings: Avoid semicolons, equals signs, SQL keywords and slash characters in goods descriptions; HMRC examples include 'VALVE - BODY ONLY ( = 1/2")', ' ; SELECT WINES OF THE DORDOGNE' and bare slash usage in goodsDescription. Source: WAF Trigger Examples v0.4.

High-frequency validation families: The most reusable prevention buckets are missing mandatory data (CDS10001), invalid format (CDS10010), invalid domain value (CDS10020), invalid relation or conditional dependency (CDS11004, CDS12070-72), and tariff-measure conditions (CDS40045, CDS40066). Source: CDS Error Codes 11-03-2026 issue.

Known differences and workarounds: The known-differences workbook remains necessary for edge cases where current CDS behaviour differs from tariff intent; declarants should check the document when a listed error code appears or when a workaround is mandated. Source: Declarant\_CWD\_Pre\_5.0.0.ods.

### Submission Timing

Maintenance windows: HMRC publishes planned maintenance windows and queueing notices on the service-availability page instead of a fixed daily TDR cut-off timetable. Example: exports submitted during the 18 February 2026 maintenance window were queued until completion. Source: Customs Declaration Service: service availability and issues.

Rate limiting: Standard CDS rate limit is 3 requests per second per application, with CDS users pre-approved for 8 requests per second if obtained through SDST; applications should back off and retry after HTTP 429 responses. Source: Developer set up guide.

Token window: A declarant access token expires after 4 hours and needs refresh handling in TDR and production. Source: CDS RunBook slide 12.

### Qa Checkpoints

Three-stage validation: Validate every message against the XSD, then against known WAF trigger patterns, then against business rules before treating a scenario as TDR-ready. Source: CDS 03 DSSD v2.30.

Header and version check: Confirm the Accept header matches the TDR version for the subscribed API before each test run. Source: Developer set up guide and CDS RunBook slide 10.

File-upload hygiene: Validate file count, size, extension and filename safety before upload; successful uploads should return document-reference codes that can be retained as evidence. Source: CDS Secure File Upload UI User Guide v0.44.

## 6. Use-Case Supplementary Search

A targeted search was run for externally hosted but HMRC-endorsed or HMRC-originated TDR implementation material, including trade-association webinar posts, mirrored HMRC slide decks and professional-body summaries.

Source: The Bonded Warehousekeepers Association - HMRC Webinar: CDS - Trader Dress Rehearsal. Date: 2021-09-15. Relevance: 5/5. Summary: Trade-association post describing an HMRC-led overview session focused on TDR benefits, migration planning and support routes; useful as externally hosted evidence of HMRC-endorsed TDR onboarding messages. URL: <https://www.thebwa.com/hmrc-webinar-cds-trader-dress-rehearsal/>

Source: The Bonded Warehousekeepers Association - CDS Trader Dress Rehearsal Declarant Roundtable (PDF). Date: 2021-09-01. Relevance: 5/5. Summary: Externally hosted but HMRC-branded 'OFFICIAL' slide deck covering declarant-focused TDR positioning, migration benefits, and support expectations. URL: <https://www.thebwa.com/wp-content/uploads/CDS-Trader-Dress-Rehearsal-Declarant-Roundtable.pdf>

Source: Charles Kendall / HMRC Readiness Presentation (PDF mirror). Date: 2022-05-18. Relevance: 4/5. Summary: Mirror of an HMRC town-hall deck that explicitly includes the TDR stage and repeats key programme warnings such as 'not for performance testing' and 'doesn't create legal declarations'. URL: <https://www.charleskendall.com/uploads/files/CDS-HMRC-Readiness-Presentation-18-May-2022.pdf>

Source: ICAEW article linking to HMRC export migration webinar. Date: 2024-03-04. Relevance: 3/5. Summary: Professional-body summary that points traders to HMRC's free TDR service and a separate HMRC webinar on preparing to move exports to CDS; useful corroboration but secondary to official HMRC sources. URL: <https://www.icaew.com/insights/tax-news/2024/mar-2024/uk-exporters-must-switch-to-cds-by-june>

Source: Air Cargo Week report on BIFA / ASM migration webinar. Date: 2024-01-26. Relevance: 3/5. Summary: Trade-press write-up reporting that BIFA and ASM highlighted higher migration success among TDR users; relevant as industry evidence but not a normative HMRC rule source. URL: <https://ppd.aircargoweek.com/bifa-and-asm-webinar-prepares-businesses-for-final-migration-to-new-customs-declaration-service-for-exports/>

## Appendix A. Rule Metadata Index

The appendix prints a compact per-rule index. The CSV and checklist workbook contain the same rule set in machine-readable form.

TDR-R-00001 | Field-level requirement | Import declaration | Import H1: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H1.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00002 | Field-level requirement | Import declaration | Import H2: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H2.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00003 | Field-level requirement | Import declaration | Import H3: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H3.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00004 | Field-level requirement | Import declaration | Import H4: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H4.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00005 | Field-level requirement | Import declaration | Import H5: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H5.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00006 | Field-level requirement | Import declaration | Import H8: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H8.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00007 | Field-level requirement | Import declaration | Import I1: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.  
Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6  
Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is I1.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00008 | Field-level requirement | Import declaration | Import I1 (B&E): DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is I1 (B&E).; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00009 | Field-level requirement | Import declaration | Import C21I: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is C21I.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00010 | Field-level requirement | Import declaration | Import C21I EIDR: DE 1/1 Declaration Type at H level is mandatory; cardinality 1x; format a2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!6

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is C21I EIDR.; 1/1 Declaration Type at H level is mandatory.; Populate XML path Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a2.; Value is drawn from HMRC codelist TradeMovementTypes for this item.

TDR-R-00021 | Field-level requirement | Import declaration | Import C21I: DE 1/2 Additional Declaration Type at H level is mandatory; cardinality 1x; format a1.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!7

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is C21I.; 1/2 Additional Declaration Type at H level is mandatory.; Populate XML path

Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a1.; Value is drawn from HMRC codelist DeclarationTypes for this item.

TDR-R-00022 | Field-level requirement | Import declaration | Import C21I EIDR: DE 1/2 Additional Declaration Type at H level is mandatory; cardinality 1x; format a1.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!7

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is C21I EIDR.; 1/2 Additional Declaration Type at H level is mandatory.; Populate XML path

Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a1.; Value is drawn from HMRC codelist DeclarationTypes for this item.

TDR-R-00023 | Field-level requirement | Import declaration | Import FSD: DE 1/2 Additional Declaration Type at H level is mandatory; cardinality 1x; format a1.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!7

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is FSD.; 1/2 Additional Declaration Type at H level is mandatory.; Populate XML path

Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a1.; Value is drawn from HMRC codelist DeclarationTypes for this item.

TDR-R-00024 | Field-level requirement | Import declaration | Import SRDS: DE 1/2 Additional Declaration Type at H level is mandatory; cardinality 1x; format a1.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!7

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is SRDS.; 1/2 Additional Declaration Type at H level is mandatory.; Populate XML path

Declaration/TypeCode only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format a1.; Value is drawn from HMRC codelist DeclarationTypes for this item.

TDR-R-00892 | Field-level requirement | Import declaration | Import I1 (B&E): DE 4/7 Calculation of Taxes - Total at I level is mandatory when the group-level item is present; cardinality 1:1; format n..16.2.

TDR-R-00893 | Field-level requirement | Import declaration | Import C21I: DE 4/7 Calculation of Taxes - Total at I level is mandatory when the group-level item is present; cardinality 1:1; format n..16.2.

TDR-R-00894 | Field-level requirement | Import declaration | Import H1: DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present; cardinality 1:1; format a3 Must be Upper Case Defaults to GBP.

TDR-R-00895 | Field-level requirement | Import declaration | Import H3: DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present: cardinality 1:1: format a3 Must be Upper Case Defaults to GBP.

TDR-R-00896 | Field-level requirement | Import declaration | Import H4: DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present: cardinality 1:1: format a3 Must be Upper Case Defaults to GBP.

TDR-R-00897 | Field-level requirement | Import declaration | Import H5: DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present; cardinality 1:1; format a3 Must be Upper Case Defaults to GBP.

TDR-R-00898 | Field-level requirement | Import declaration | Import I1: DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present: cardinality 1:1: format a3 Must be Upper Case Defaults to GBP.

TDR-R-00899 | Field-level requirement | Import declaration | Import I1 (B&E): DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present: cardinality 1:1: format a3 Must be Upper Case Defaults to GBP.

TDR-R-00900 | Field-level requirement | Import declaration | Import C21: DE 4/7 Calculation of Taxes - Total - Currency at I level is mandatory when the group-level item is present: cardinality 1:1; format a3 Must be Upper Case Defaults to GBP

TDR-R-00911 | Field-level requirement | Import declaration | Import H4: DE 4/9 Additions and Deductions at H and / or I level is dependent; cardinality 99x (H) 99x (I); format -.

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error

Acceptance: Import declaration context is C21I EIDR.; 6/8 Description of Goods at I level is mandatory.; Populate XML path Declaration/GoodsShipment/ GovernmentAgencyGoodsItem/ Commodity/ Description only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format an..512.

TDR-R-01228 | Field-level requirement | Import declaration | Import SRDS: DE 6/8 Description of Goods at I level is mandatory; cardinality 1x; format an..512.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!157

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error

Acceptance: Import declaration context is SRDS.; 6/8 Description of Goods at I level is mandatory.; Populate XML path Declaration/GoodsShipment/ GovernmentAgencyGoodsItem/ Commodity/ Description only where this rule permits it.; Respect cardinality 1x.; Value conforms to HMRC format an..512.

TDR-R-01229 | Field-level requirement | Import declaration | Import H1: DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!158

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H1.; 6/9 Type of Packages at I level is mandatory.; Populate XML path Declaration/GoodsShipment/ GovernmentAgencyGoodsItem/ Packaging/ TypeCode only where this rule permits it.; Respect cardinality 99x.; Value conforms to HMRC format an2.; Value is drawn from HMRC codelist PackageTypes for these items.

TDR-R-01230 | Field-level requirement | Import declaration | Import H2: DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!158

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H2.; 6/9 Type of Packages at I level is mandatory.; Populate XML path Declaration/GoodsShipment/ GovernmentAgencyGoodsItem/ Packaging/ TypeCode only where this rule permits it.; Respect cardinality 99x.; Value conforms to HMRC format an2.; Value is drawn from HMRC codelist PackageTypes for these items.

TDR-R-01231 | Field-level requirement | Import declaration | Import H3: DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!158

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H3.; 6/9 Type of Packages at I level is mandatory.; Populate XML path Declaration/GoodsShipment/ GovernmentAgencyGoodsItem/ Packaging/ TypeCode only where this rule permits it.; Respect cardinality 99x.; Value conforms to HMRC format an2.; Value is drawn from HMRC codelist PackageTypes for these items.

TDR-R-01232 | Field-level requirement | Import declaration | Import H4: DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!158

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H4.; 6/9 Type of Packages at I level is mandatory.; Populate XML path Declaration/GoodsShipment/ GovernmentAgencyGoodsItem/ Packaging/ TypeCode only where this rule permits it.; Respect cardinality 99x.; Value conforms to HMRC format an2.; Value is drawn from HMRC codelist PackageTypes for these items.

TDR-R-01233 | Field-level requirement | Import declaration | Import H5: DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!158

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is H5.; 6/9 Type of Packages at I level is mandatory.; Populate XML path Declaration/GoodsShipment/GovernmentAgencyGoodsItem/ Packaging/ TypeCode only where this rule permits it.; Respect cardinality 99x.; Value conforms to HMRC format an2.; Value is drawn from HMRC codelist PackageTypes for these items.

TDR-R-01234 | Field-level requirement | Import declaration | Import I1: DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

Reference: CDS 03 Declaration Technical Completion Matrix for Imports | v3.92 | Data Completion Rules!158

Error code/pattern: CDS10001 | CDS10010 | xml\_validation\_error | CDS10020

Acceptance: Import declaration context is I1.; 6/9 Type of Packages at I level is mandatory.; Populate XML path Declaration/GoodsShipment/GovernmentAgencyGoodsItem/ Packaging/ TypeCode only where this rule permits it.; Respect cardinality 99x.; Value conforms to HMRC format an2.; Value is drawn from HMRC codelist PackageTypes for these items.

TDR-R-01235 | Field-level requirement | Import declaration | Import I1 (B&E): DE 6/9 Type of Packages at I level is mandatory; cardinality 99x; format an2.

TDR-R-03110 | Cross-field integrity | Export declaration | Export procedure derivation: declaration type CO, additional declaration type Z, and requested procedure 3153 must derive category B4.

Reference: CDS 03 Declaration Technical Completion Matrix for Exports | v5.7 | Procedure Category Derivation 1!24

Error code/pattern: CDS11004 | CDS11005 | CDS12050 | CDS12052

Acceptance: DE 1/1 equals CO.; DE 1/2 equals Z.; DE 1/10 equals 3153.; The combination derives procedure category B4.

TDR-R-03111 | Cross-field integrity | Export declaration | Export procedure derivation: declaration type CO, additional declaration type Z, and requested procedure 3171 must derive category B4.

Reference: CDS 03 Declaration Technical Completion Matrix for Exports | v5.7 | Procedure Category Derivation 1!24

Error code/pattern: CDS11004 | CDS11005 | CDS12050 | CDS12052

Acceptance: DE 1/1 equals CO.; DE 1/2 equals Z.; DE 1/10 equals 3171.; The combination derives procedure category B4.

TDR-R-03112 | Global validation | All CDS XML messages | Declaration, amendment, cancellation and goods-arrival payloads must pass HMRC XSD schema validation before CDS processing begins.

Reference: CDS Declaration Submission Service Design | v2.30 | Section 2.2 Technical Validation Carried out on all Declarations

Error code/pattern: BAD\_REQUEST | xml\_validation\_error

Acceptance: Payload conforms to the HMRC-published XSD for the API and version in use.; No datatype, element-order or invalid-element schema errors are returned.; HTTP 400 is not returned by the API gateway.

TDR-R-03113 | Global validation | All CDS XML messages | Payload content must not trigger the HMRC web application firewall regular-expression rules.

Reference: CDS Declaration Submission Service Design | v2.30 | Section 2.2 Web Application Firewall (WAF) Validation

Error code/pattern: HTTP 403 PAYLOAD\_FORBIDDEN | HTTP 500 INTERNAL\_SERVER\_ERROR

Acceptance: Free-text fields do not contain blocked character combinations or keyword patterns.; The API does not return PAYLOAD\_FORBIDDEN or Internal server error at WAF stage.

TDR-R-03114 | Global validation | Declaration submission | CDS does not accept batch declaration submission; declarations must be submitted individually.

Reference: CDS Declaration Submission Service Design | v2.30 | Section 2 Scope for Declaration Management

Error code/pattern: DMSREJ validationResultType | API rejection

Acceptance: Each API call contains one declaration message only.; No batch wrapper or multi-declaration payload is sent.

TDR-R-03115 | Global validation | Declaration submission | Local Reference Number (LRN / submitterReference / DE 2/5) must be unique against accepted and registered declarations and cannot be reused within 48 hours.

Reference: CDS Error Codes | 11-03-2026 issue | CDS12003

Error code/pattern: CDS12003

Acceptance: DE 2/5 is unique for the trader among accepted and registered declarations.; A rejected declaration's LRN may be reused; an accepted or registered one may not be reused within 48 hours.

TDR-R-03116 | Cross-field integrity | Declaration submission | DE 1/9 Total Number of Items must equal the number of goods items declared.

Reference: CDS Error Codes | 11-03-2026 issue | CDS11003

Error code/pattern: CDS11003

Acceptance: DE 1/9 matches the count of goods-item structures in the payload.; No extra or missing goods-item nodes exist relative to DE 1/9.

TDR-R-03117 | Cross-field integrity | Import and export declarations | All goods items on a declaration must derive the same procedure category.

Reference: CDS Error Codes | 11-03-2026 issue | CDS11005

Error code/pattern: CDS11005

Acceptance: Every item's DE 1/10 and DE 1/2 combination derives the same declaration category.; No mixed-category declaration is submitted.

TDR-R-03118 | Cross-field integrity | Import and export declarations | Net mass must be lower than gross mass.

Reference: CDS Error Codes | 11-03-2026 issue | CDS11006

Error code/pattern: CDS11006

Acceptance: Where both masses are declared, net mass is less than gross mass for the same scope.

TDR-R-03119 | Additional-message validation | Goods arrival | A goods-arrival notification must follow a pre-lodged declaration in a permissible state.

Reference: CDS Error Codes | 11-03-2026 issue | CDS12014

Error code/pattern: CDS12014 | CDS12015

Acceptance: A pre-lodged declaration exists for the reference used by the goods-arrival message.; The referenced declaration is in a state that permits arrival.

TDR-R-03120 | Additional-message validation | Goods arrival | Goods-arrival notifications must be submitted within 30 days of the pre-lodged declaration.

Reference: CDS Error Codes | 11-03-2026 issue | CDS12031 / CDS12046

Error code/pattern: CDS12031 | CDS12046

Acceptance: Arrival is submitted within the 30-day window measured from the original declaration receipt date.

TDR-R-03121 | Additional-message validation | Amendment and cancellation | A new amendment or cancellation request cannot be submitted while a previous request is still awaiting response.

Reference: CDS Error Codes | 11-03-2026 issue | CDS12036

Error code/pattern: CDS12036

Acceptance: Only one in-flight amendment or cancellation request exists per declaration lifecycle point.

TDR-R-03122 | Additional-message validation | Amendment | The submission channel of an amendment must match the original declaration channel.

Reference: CDS Error Codes | 11-03-2026 issue | CDS12034

Error code/pattern: CDS12034

Acceptance: The amendment uses the same submission channel as the original declaration.

TDR-R-03123 | Format rule | Supporting-document upload | The secure file-upload service accepts at most 10 files, each up to 10 MB, and only jpeg, pdf, doc, docx, xls, xlsx, or png formats.

Reference: CDS Secure File Upload UI User Guide | v0.44 | Section 3.1.5 File Upload

Error code/pattern: HTTP 413 | BAD\_REQUEST

Acceptance: No more than 10 files are uploaded in one submission set.; Each file is 10 MB or smaller.; Each file extension is one of jpeg, pdf, doc, docx, xls, xlsx, png.

TDR-R-03124 | Format rule | Supporting-document upload | Avoid %, ?, &, tabs, and other special characters in secure-file-upload filenames because the service may behave unexpectedly.

Reference: CDS Secure File Upload UI User Guide | v0.44 | Section 3.1.5 File Upload

Error code/pattern: BAD\_REQUEST | HTTP 403 PAYLOAD\_FORBIDDEN | Unexpected file-read failure

Acceptance: Filename characters are HTTP-safe and do not contain %, ?, &, tabs, or special characters flagged by HMRC.

TDR-R-03125 | Format rule | WAF-sensitive free-text fields | Avoid semicolons, equals signs, slash characters in goods descriptions, and SQL-keyword patterns in free text because these combinations are known WAF triggers.

Reference: WAF Trigger Examples | v0.4 | General Advice tab (GA1-GA4)

Error code/pattern: HTTP 403 PAYLOAD\_FORBIDDEN | HTTP 500 INTERNAL\_SERVER\_ERROR

Acceptance: Free-text fields do not contain ';', '=', SQL-keyword strings, or '/' in goodsDescription where HMRC has flagged them as trigger patterns.; Known trigger examples are removed or rewritten before submission.

TDR-R-03126 | Format rule | Export inventory linking | MUCR values must match HMRC's published CDS MUCR formats, contain no more than one hyphen, and MRNs must not be submitted as export movements.

Reference: CDS Guidance for Software Developers - MUCR Format | Baseline | Sections 2 and 4 Appendix

Error code/pattern: MUCR reference is invalid | DMSREJ | ILE NAK

Acceptance: MUCR length is 35 characters or fewer.; MUCR matches one HMRC-published CDS format.; No MRN is used in place of a MUCR on export movement messaging.

TDR-R-03127 | Format rule | Authorisations | Authorisation references declared in DE 2/3 and DE 3/39 must match HMRC-published CDS authorisation formats for the declared authorisation type.

Reference: CDS Guidance for Software Developers - Validation of Authorisations | v1.9 | Authorisations Table

Error code/pattern: CDS12005 | CDS12006 | CDS12007

Acceptance: The declared authorisation or licence reference matches the HMRC format for its type.; The reference belongs to the declared party and is valid for the scenario.

TDR-R-03128 | Business-rule validation | Tariff measures | Where a tariff measure requires a document, CDS returns CDS40045 if the required document is missing; where a measure condition or range is not met, CDS returns CDS40066.

Reference: CDS Declaration Submission Service Design | v2.30 | Section 6.3 Tariff Measure Validation Failures

Error code/pattern: CDS40045 | CDS40066

Acceptance: All document-based measure conditions are declared on the affected commodity lines.; All value, ratio, or other measure conditions are satisfied for the affected commodity lines.

TDR-R-03129 | Integration rule | Trader Dress Rehearsal environment | The Accept header must target the TDR API version for each subscribed CDS API, including Customs Declarations API v1.0 in TDR.

Reference: Developer set up | Customs Declarations End-to-End Service Guide | Web page | API versioning

Error code/pattern: HTTP 406 Not Acceptable

Acceptance: The request Accept header matches the TDR API version subscribed for that environment.; The application is allow-listed and subscribed to that API version.

TDR-R-03130 | Operational rule | Trader Dress Rehearsal proving | TDR should be used for realistic, day-in-the-life declaration proving with real account data, not for performance or exploratory technical testing.

Reference: CDS RunBook | v4.3 | Slide 17 Guidance / Slide 2 Connecting to TDR

Error code/pattern: Support escalation / misuse risk

Acceptance: TDR test scenarios use realistic declarant data and declaration journeys.; The proving pack excludes performance, load, or exploratory protocol testing in TDR.

TDR-R-03131 | Operational rule | Service availability | Submission planning must account for HMRC's published service-availability notices, planned maintenance windows, and queued-processing warnings.

Reference: Customs Declaration Service: service availability and issues | Web page | Current and historical update entries

Error code/pattern: Service queueing / delayed processing

Acceptance: Submission windows are checked against the HMRC service-availability page before go-live or dress-rehearsal runs.; Exports needing Permission to Progress are not first submitted during a published queueing window.
