

HM Revenue & Customs

Issue with out of sequence EMR/ERS updates impacting CCS-UK customers.

Dear Customer,

All businesses will be able to move all their export declarations from our Customs Handling of Import and Export Freight (CHIEF) system to the Customs Declarations Service (CDS) from Monday 4 March 2024. This includes declarations for all goods that move through all routes – including inventory linked maritime locations.

HMRC are aware of an issue that is impacting some CCS-UK customers whereby certain CDS export response messages are received out of sequence.

This issue can be tracked under KEL reference 604 within the consolidated workaround document and will be resolved in due course.

In the interim period we advise you to follow the steps outlined below:

Guidance for Airline/ITSF

If you receive a final MUCR status update with Route 3/6, SOEC or Route 3/6, “XA ACCEPTED”, this is an indication that messages have been received out of sync.

Retransmit/re-arrive the MUCR to gain the correct status of Route 3/6, SOE3 or Route 3/6, “XC OK TO PROCEED”.

Guidance for DEPs

The same issue as described above can also occur for DUCR status updates, although in this scenario the final out of sync status update will be Route 3/6, SOE14.

Retransmit/re-arrive the DUCR to gain the correct status update of Route 3/6, SOE3.

Guidance for Declarants

If your software is showing P2P status against a MUCR and an Airline/ITSF is advising you that the MUCR in question does not have P2P, please refer the Airline/ITSF to this guidance.

We are also working closely with Airline/ITSF software developers to implement IT changes which will handle out of sync message responses automatically and without the need to re-arrive.

If you have any questions, please contact us through the usual [channels of communication](#) or via your Account Manager or Customer Compliance Manager, if you have one.

You can also [report a problem when using the CDS](#) on GOV.UK.

Kind regards,

HMRC
