Guidance on submitting CDS exports pre-lodged declarations for goods exiting via an inventory linked location where GVMS is used for Imports only

Dear Customer,

All export declarations are due to move from our Customs Handling of Import and Export Freight (CHIEF) system to the Customs Declaration Service (CDS).

Declarants can now start submitting export declarations through CDS for goods being exported via an air inventory linked location or via a GVMS location.

In preparation for CDS Exports Open Migration for maritime Inventory linked locations, HMRC would like to provide guidance for submitting CDS exports pre-lodged declarations for locations that may also operate GVMS for imports only.

It is important to submit your pre-lodged declarations using the correct goods location code. Failure to submit CDS exports pre-lodged declarations with the correct goods location codes may result in your declaration being invalidated upon arrival and will require corrective action to be taken as outlined in the below guidance.

Best practice for Declarants/Exporters

Although the following locations operate inventory linking and GVMS (carrier dependant) for Imports, they do not operate GVMS for Exports. These locations are inventory linking only for Exports. It is therefore important that when you submit a CDS exports pre-lodged declaration, you must use the correct inventory linking goods location code and do not use the GVMS goods location code (ending in "GVM"), otherwise your declaration will be invalidated on arrival.

Port Location	Berth Name	Code
Felixstowe	Dooley Terminal	GBAUFXTFTXT
Harwich	Harwich International Port - Stena Line	GBAUHRWHRHHRW
Hull	Hull Ferry Terminal 1 - River Berth RoRo	GBAUHULHULHUL
Immingham	DFDS	GBAUIMMIMMIMM
Killingholme	Killingholme RoRo Berths	GBAUNKHIMMNKH
Port of Tyne	DFDS - North Shields	GBAUNSHTYNNSH
Purfleet	Purfleet RoRo Berths	GBAUPFTLONPFT
Teesport	PD Teesport	GBAUTEEMIDTEE
Tilbury	Tilbury 2 RoRo Berth	GBAUTILLONTIL

Guidance for Declarants/Exporters

Pre-arrival If you have submitted a CDS exports pre-lodged declaration for goods exiting via one of the locations listed above, check your declaration to ensure that you have not used a GVMS goods location code. If you have used a GVMS goods location code, amend the declaration before goods physically arrive at the Port.

Post-arrival

If you do not amend the declaration before goods physically arrive at the Port, your declaration will be invalidated upon arrival. In this case, a DMSREJ notification is returned and the inventory system will be updated. We recommend that when you receive a DMSREJ, you should check the status of your declaration using Declaration Interrogation Service (DIS) or Inventory Linking Exports (ILE) query service. SOE 5 will be returned for a declaration invalidated upon arrival.

You will need to

1. Submit a new CDS declaration using the same DUCR but with a new LRN if your software allows this
 - a. Or, if software does not allow this, submit a new CDS declaration with a new DUCR reference (e.g. add an extra character to the end)
2. Inform the DEP/carrier and ask for a re-arrival of the same DUCR or arrival of the new DUCR to be sent

NB: If exceptions apply and **you have been asked to revert to CHIEF**, you will need to use a new DUCR reference in all cases.

Please note: if a CDS arrived export declaration has been submitted with GVMS details and was intended for export via a GVMS arrived location but is then arrived at an inventory linked location, the declaration will **not** be invalidated on arrival.

If you have any questions, please contact us through the usual [channels of communication](#) or via your Account Manager or Customer Compliance Manager, if you have one.

You can also [report a problem when using the CDS](#) on Gov.uk.

Kind regards,

HMRC
