Appendix/Dataset Naming Convention Changes

As part of the September release of SPIMM functionality, the current Declaration Completion Instructions for imports will be split to cover three specific journeys:

- SPIMM, as covered in the attached documents,
- Other NI Goods Movements and
- GB Goods Movements

As part of this split, the previous 'Appendices' will be renamed into collected code lists which will serve all three journeys, with each code stating what journeys it is allowed on.

The most recent version of the SPIMM completion instructions that apply the new NI Command Paper terminology have adopted this new naming convention throughout in preparation for September publishing. However, as these changes are not yet reflected in online guidance, the below table provides information on how to map key appendices shared with SPIMM changes to the new naming convention.

Please note that one of the key changes is removing the distinction between national and union codes in DE 2/2 and DE 2/3. This means that Code list 2 and Code list 3 will cover all codes for DE 2/2 and DE 2/3 respectively. For ease, they remain differentiated in this table but note that after September 2024 National and Union codes will be found in the same Code List.

Please also note that Appendix 1 (Procedure Codes) and Appendix 2 (Additional Procedure Codes) will not be included in the new Code List terminology.

Current GOV.UK Terminology	Previous Terminology in Green Lane Guidance	Post-September Naming Convention used in Updated SPIMM Guidance (24/06/17)
